SUMMARY

Software Engineering undergraduate (2026) specializing in backend systems, full-stack development, and AI-driven automation using React, Node.js, ASP.NET Core, and cloud technologies. Delivered production-grade financial analytics tools at Mphasis, engineered enterprise REST APIs, and developed scalable B2B outreach pipelines. Solved 400+ DSA problems and published cybersecurity research on Advanced Persistent Threat detection using Graph Neural Networks.

EXPERIENCE

Software Development Engineer Intern

Jan 2026 – Apr 2026

Mphasis

Bangalore

- Engineered **3 production-grade financial analytics modules** using ASP.NET Core and React within a **10-member engineering team**, improving enterprise reporting workflows.
- Designed and integrated **5+ RESTful APIs** for finance systems, reducing manual data processing effort by **40%** through workflow automation.
- Implemented a **GitHub API-based CI/CD automation pipeline** to identify and deprecate stale feature flags, improving code maintainability and reducing technical debt.

Research Intern

Jun 2024 – Sep 2024

Bringer

Remote

- Engineered an end-to-end deep learning face recognition system using **RetinaNet** and **Siamese Networks**, achieving **99.2% detection accuracy** with **100ms inference latency**.
- Architected a scalable face-matching pipeline leveraging **YOLOv8** and **Inception-ResNet**, supporting **10,000+ facial embeddings** with high-precision, low-latency retrieval.
- Streamlined cross-device model integration and benchmarking, maintaining **95%+ recognition accuracy** across heterogeneous hardware environments.

PROJECTS

AI-Powered B2B Outreach Automation Pipeline | GitHub | Link | *MERN Stack*

Jun 2026

- Automated an AI-powered outbound sales platform converting **1 seed company into 20–100+ qualified lookalike companies** using Ocean.io APIs.
- Automated extraction of **50+ decision-makers per run** with verified contact enrichment using LinkedIn, Prospeo, and Eazyreach APIs.
- Generated and delivered **100+ personalized cold emails** per execution through Brevo API integrations.
- Reduced manual prospecting time from **3–4 hours to under 2 minutes** via end-to-end automation.

Advanced Persistent Threat Detection | GitHub | Paper | *Python, GNN, TensorFlow*

Oct 2025

- Authored a peer-reviewed study proposing **Domain-Adaptive streamlined Graph Transformer (DAOGT)** for multi-stage Advanced Persistent Threat (APT) detection.
- Designed a novel Graph Transformer framework integrating **Activity-Constrained Feature Selection (ACFS)** and adaptive quantile clipping to preserve minority attack patterns and model stage transitions.
- Achieved **98% accuracy** and **0.96 F1-score** on CICIDS2017, outperforming ANN, CNN, LSTM, GNN, and GCN baselines while reducing false positives by **20%**.
- Applied **GNNExplainer** for interpretable attack-stage prediction, highlighting critical graph nodes and feature contributions for anomaly analysis.

OrderYum – Food Delivery App | GitHub | *React Native, Expo, Firebase*

Dec 2024

- Developed a cross-platform food delivery app with **secure authentication** and **10+ API integrations**.
- Optimized backend data flow on Firebase, reducing transaction **latency by 30%**.
- Built **8 reusable UI components**, improving development speed and maintainability.

TECHNICAL SKILLS

Languages: C++, C#, Python, Java, JavaScript

Backend: Node.js, Express.js, ASP.NET Core, REST APIs, RESTful Web Services

Frontend: React.js, React Native, HTML, CSS, Tailwind CSS

Databases: MongoDB, SQL

AI/ML: Machine Learning, Natural Language Processing, Deep Learning, Graph Neural Networks, TensorFlow, OpenAI API

Cloud & Tools: Git, GitHub, Postman, Swagger, Vercel, Oracle Cloud Infrastructure, CI/CD

Core: Data Structures, Algorithms, System Design, Object-Oriented Programming

EDUCATION

SASTRA University
Bachelor of Technology in Information and Communication Technology — CGPA: 7.67

Thanjavur, TN
2022 – 2026

ACHIEVEMENTS

- **Solved 400+ DSA problems** across LeetCode and GeeksforGeeks.
- **Ranked within the top 50%** on Codeforces through consistent competitive programming.
- Co-authored a research paper on APT detection using Graph Neural Networks in collaboration with **SASTRA University** and **Ministry of Electronics and Information Technology (MeitY)**.
- Coding portfolio: codolio.com/profile/Shubhanshi

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Foundations Associate <i>Oracle</i>	Jun 2025
Google AI Essentials <i>Coursera</i>	Jan 2025
IBM Introduction to Generative AI <i>Coursera</i>	Mar 2025
Artificial Intelligence (Beginner to Advanced) <i>Infosys Springboard</i>	Jul 2025
